Activity guidelines

Instruction

- The child balances while standing on an upright Roller
- Encourage the child to keep their eyes on an object that you move in different positions
- Move the object up, down and from side to side
- Gently tap the hand that the child should then use to grab the object

Mastery

- The child stands safely on the Roller and remains stable while their eyes follow an object
- The child waits to grab the object until touched

Assesment

Observe whether the challenge is in the child's proximal zone of development, or whether it is either too easy or too difficult for the child.

Read more about how to assess this on page 13.

About Roller

The Roller offers a progressive motor skills challenge, from small kids just managing to keep their balance with the support of a friend or a hand rail, to older children pushing the boundaries of what they can do without falling off.

Dimensions
Diameter 29.5 cm, L 35 cm.
